

CROSS LTi/d

Entry / Exit Terminal

The CROSS LTi/d entry terminal is part of the CrossPark parking system and is mainly intended for residential parking for reading contactless subscription cards and tickets. The optional equipment also includes a payment terminal, which uses tokenization (Tap-in - Tap-out function) to provide customers with an identifier that allows them to stay in the parking lot. It works with CROSS AZN automatic barrier.

The CROSS LTi/d exit terminal is part of the CrossPark parking system for reading parking tickets (barcode, QR code), for reading contactless subscription cards (if they are part of the system), or for exiting via a token, using payment via a bank terminal located directly on the Lti/d. Works with CROSS AZN automatic barrier.

KEY FEATURES

- Touch LCD display 7"
- Configurable Idle Screen (Ad Option)
- High reliability
- Easy maintenance
- CROSS AZN barrier control
- TCP/IP communication

TECHNICAL SPECIFICATION

Power supply	230 V / 50 Hz - 12 VDC
IP	IP 44
Dimensions	1365 x 220 x 240 mm
Weight	24 kg
Operational temperature range	-25 up to + 55 °C

OPTIONAL EQUIPMENT

- Bank set for the tokenization system and payment at the exit (Identification using a payment card)
 - Ingenico SELF 2000
 - Ingenico SELF 4000
- External barcode or QR code scanner
- RFID card reader, third-party device integration
- IP/GSM Intercom/camera/third party integration option
- RAL shade 7015/7040
